

BLUE MAX ROLLER

PRODUCT DESCRIPTION

Blue contamination collection rollers, with over 30 years of refinement.

The BlueMAX roller has been developed in very demanding applications such as the printed circuit board industry, medical packaging, glass manufacture. We know from experience that the BlueMAX roller does not leave any residue on the substrate that it cleans.

Benefits:

- Optimum yields.
- Optimum product quality.
- Low maintenance.
- Quick return on investment.

APPLICATION

Blue max roller works with CTR's to collect of particulate from the web in printing industry.

PROPERTIES

- The best cleaning performance.
- Collects 97% of particles down to 0.5 microns.
- Long life [typically > 3 years].
- Guaranteed straightness, roundness and TIR.
- Hardness and surface finish to suit substrate.
- Large range of tooling for Teknek, KSM, Rayon, SDI, Western Magnum roller replacements.
- Special sizes.
- Special formulations.
- Special colours.
- Diameter from 20-112mm [0.78-4.4"].
- Length 50-3000mm [2-118"].
- FDA type available.
